DiskEraser wipes hard drives clean

Nervous about donating your PC to strangers? The DiskEraser from nexGrēn can ease your mind. You can use the program to completely erase your hard drive, making it easier to pass on a used PC to others. The program writes random data on the entire hard drive, eventually leaving the drive and system free of data. The program includes on-screen instructions, which guide you through the three main steps needed to erase your hard drive. It costs \$20.
